ON-CAMPUS UNDERGRADUATE PROGRAM

The On-Campus Program, as the name suggests, has its home base on our Prescott, Arizona campus. Learning takes place in the field as often as in a dynamic group discussion format in the classroom. Prescott College is known for its three week orientation for new students through a Desert, Mountain, and Canyon Expedition or Community Based Program. Travel, application of learning, and interdisciplinary study are embedded in the curriculum.

BACHELOR OF ARTS

• Adventure Education
• Arts & Letters
• Cultural & Regional Studies
• Education
• Environmental Studies
• Human Development & Psychology

  o Early Childhood Education
  o Elementary Education
  o Secondary Education
  o Cross-Categorical Special Education
• Individualized program, non-certification track
• Human Development or Human Services
• Sustainability & Environmental Studies

LIMTED-RESIDENCY UNDERGRADUATE PROGRAM

This program serves transfer students of all ages who wish to complete a B.A. degree or a post-bachelor’s teacher preparation program using a flexible format. The mix of mentored studies courses and faculty-led online courses gives a personalized educational experience. Our commitment to collaborative and experiential learning is unmatched at other colleges—we’ve been doing it for 40 years. A two-day residency in Prescott, Arizona at the beginning of the program is required. Students will meet with faculty and fellow students and immerse in the online course delivery system and one-on-one mentored studies model. After the residency, students will study from home.

• Individualized program, non-certification track
• Human Development or Human Services
• Sustainability & Environmental Studies

PREQUISITES:

High school graduation or G.E.D.; 30 transfer credits or more are strongly recommended, and students in this program will benefit from having chosen their major.

TRANSFER INFORMATION:

Transfer credits from regionally accredited colleges, earned at a “C-” grade or higher can be applied toward the student’s program. Depending on the area of study chosen, Prescott College may accept as many as 90 applicable semester credits for transfer. Associate’s degrees will transfer as a block. AP Scores of 4 or 5 and CLEP (College Level Examination Program) scores (50 or higher for many subjects) may also provide transfer credits. Prescott College also offers the opportunity to earn college credit by completing a Prior Learning Assessment course and evaluation. Transfer students can start in the fall or the spring semester.

UNDERSTANDING EXPECTATIONS:

All on-campus students must demonstrate mathematics and writing proficiency in order to graduate. Thus, a student can take math and writing-intensive courses from Prescott College as a new student, or plan to transfer in mathematics courses such as College Algebra or Pre-calculus (or provide an official AP score of 4 or higher, taken within the last five years).

The Bachelor of Science degree will require additional mathematics. A foreign language is not required but many students will take Spanish and can enjoy an immersion experience at our Kino Bay, Mexico field station along with Marine Biology and Cultural Studies.

Transfer Pathways Guide

For Students Transferring From
Yavapai Community College to Prescott College

The following chart lists recommended associate-to-baccalaureate degree pathways. Courses numbered 100 level and above and completed with a C grade or higher will be accepted in transfer. Transferable courses may not be applicable to all degree programs. Courses from other associate degree programs may transfer to our baccalaureate programs on a course-by-course basis.

It is recommended that students consult an academic advisor at their Yavapai Community College to develop an educational plan for their associate’s degree or certificate of completion.

Students should consult Admissions at Prescott College to learn how coursework will apply to their selected bachelor’s degree program.
